Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

The attorney gave an overview of the claimed invention and further explained about the mask as claimed. Some proposed amendment to clearly define the invention and other claim limitations such as mask, query tree, and tree data structure were discussed. Examiners admitted that the previous office action did not clearly indicate how the reference read on the two distinct features of the invention (e.g., the mask and the query tree) but provided an interpretation of how the pattern tree of the reference was equivalent to the mask of the claimed invention. In conclusion, the attorney and examiners did not agree on whether the reference taught the mask as claimed.
